Burpee's Bulbs for Fall Planting

Of all the flowers that can be raised from bulbs, none are more easily grown than Tulips, Hyacinths, Daffodils, Crocus, and the many others offered in this book. **Anyone can grow them.** And when we consider how easily they are grown and how welcome are their gay colors and varied forms at a time of the year when flowers are scarce, it is no wonder that more and more bulbs are planted each fall for winter and spring blooming. A wonderful showing can be had at a very small cost.

The Burpee Guarantee

We guarantee the safe arrival of your order and the vitality and purity of our Bulbs and Seeds to the full amount of the purchase price. **You can have your money back any time within the year if you are not satisfied with results.** Even with the highest quality Bulbs and Seeds, success in gardening depends largely upon cultivation, soil, and weather conditions. Therefore, in no case shall W. Atlee Burpee Co. be liable for more than the amount actually paid us for Bulbs or Seeds.

Free Delivery

All Bulbs and Seeds offered in this Catalog will be delivered to you by parcel post or express prepaid.

Order Early

Bulbs ordered before they are ready to send out will be booked for delivery and orders filled in rotation as received, just as quickly as possible after bulbs are in the proper condition for planting. At the low prices quoted, it will pay you to Order Early. Seeds will be sent on receipt of order.

Plant Burpee's Bulbs and Save Money

Prices are low. Bulbs will be of the usual **High Burpee Quality**, first class in every respect, and **guaranteed** to give satisfactory results or your money will be refunded. You cannot buy better bulbs than Burpee's at any price—in fact, it may not be possible to buy at such low prices as these again. Need we urge you then to plant most liberally this year!

All bulbs listed in this Catalog, with a few exceptions, are available after the middle of September, and all hardy varieties can be planted outdoors any time from then on until the ground freezes hard. Daffodils, however, will do better if planted before the ground freezes. Practically all "fall bulbs" can be grown in pots or bowls in the house during the winter. Short cultural directions are given in this book, but if more complete instructions are wanted, ask for Burpee Leaflet No. 31, "Bulbs for Winter and Spring Blooming."

We hope to be favored with your orders this fall. Do send them in early so as to be sure to get everything you want.

The First Flowers of Spring

Often before the snow has melted the ever welcome little Snowdrops are in bloom, and while it may be still rather drab outdoors, the showy Chionodoxa, the gaudy Crocus, the lovely Scillas, and the pretty Grape Hyacinths are blooming, reminding us that another spring is here. These early flowers surely have a charm and appeal all their own.

Snowdrops. Giant Elwesii

Chionodoxa Sardensis

Scilla campanulata, Excelsior

Chionodoxa (*Glory of the Snow*)

Blooms at the same time as the Crocus. Plants grow about 5 in. high; the little spikes when covered with their showy blue flowers create a lovely display in the garden or in the rockery. Do well in a sunny or half-shaded location. Plant bulbs 3 in. deep and 3 in. apart in masses for best display.

Grape Hyacinths (*Muscari*)

Little spikes closely set with small, round bells which resemble a miniature inverted bunch of grapes. Plant bulbs 3 to 4 in. apart and 2 to 3 in. deep.

Illustrated in color on front cover and offered at such low prices that every one can afford to plant them most plentifully.

Grape Hyacinth, Heavenly Blue

Scilla Sibirica

Calochortus (Globe Tulips)

Often referred to as Fairy Lanterns; the shape of the flowers and the way they hang on the stem suggest the name. Plants are much branched and bear quite a number of exquisitely tinted flowers on long, slender, leaf-wrapped stems.

Globe Tulips are natives of woodlands, so should be planted in any friable soil mixed with plenty of leaf-mold. They like some shade but not full shade. Fine subjects to naturalize in the rock garden or in shaded woods, but they must have perfect drainage. Plant bulbs $2\frac{1}{2}$ to 3 in. deep and 3 to 6 in. apart. In cold sections, provide winter protection. Bloom in May and June.

9376 Albus White with some bronze and pinkish tinging. 18 to 30 in.

9377 Amabilis Bright canary yellow, a popular color. Up to 15 in. high.

9378 Amoenus A delightful shade of soft rose-pink. 8 to 16 in.

Any of the above Globe Tulips: 3 for 25¢; 12 for 85¢; 100 for \$6.00.

Special Collection Offer of the above 3 named Globe Tulips

9690—18 Bulbs (6 of each variety, value \$1.28) for only **\$1.00**

Calochortus (Mariposa or Butterfly Tulips)

"Mariposa" means **butterfly** in Spanish and is applied to these Tulips because the "eyes" and markings on the gorgeously colored flowers are so much like those on the wings of a butterfly. Flowers are cup-shaped and of wonderful colors, many marked with dots and pencilings. May and June. Plant bulbs $2\frac{1}{2}$ to 3 in. deep and 3 to 6 in. apart. In cold sections provide protection over the winter.

9382 Clavatus The bowl-shaped blooms, often over 4 in. across, are rich, deep golden yellow without markings. 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

9384 Luteus Lemon-yellow to cream and white; finely penciled and marked.

9386 Splendens Clear, unspotted lavender; one of the prettiest.

The flower-spikes grow 2 to 3 ft. high, and bear many star-shaped flowers $1\frac{1}{2}$ in. across in shades of blue, ranging from lavender-blue to deep purplish blue. Plant bulbs 4 in. deep and 4 to 5 in. apart. 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

Fritillaria

Does best in a sheltered, shady location in light, loose, well-drained soil. Plant bulbs 2 to 3 in. deep and 4 to 5 in. apart. In cold sections, give winter protection.

8925 Meleagris Mixed (Guinea Hen Flower or Checkered Lily) (See colored illustration on back cover.) Pendent, bell-shaped blooms in various colors, chiefly bronze and purple tones, and white, all checkered with contrasting colors, including green. Flower in April. 6 in. high. 12 for 50¢; 100 for \$3.25.

Crocus, grown cool, make excellent pot-plants

Crocus

(EARLY SPRING FLOWERING)

Crocus will grow in many places—in the lawn, flower borders, in rock gardens, edge of shrubs, on the slopes of terraces, in sun or shade, and even under trees. The best position is where they will receive the sun for only part of the day. For showy effect plant bulbs 3 to 4 in. apart, 2 in. deep. The soil should be rather dry; they will not flourish in heavy, wet soil. Rich soil is not necessary, but will prove beneficial. When planted in the lawn, select a place where the grass need not be cut until the foliage of the Crocus has matured. This is essential if flowers are wanted in future years. To avoid formal arrangements, scatter the bulbs on the lawn and plant them where they fall. In borders, bulbs should be planted about 3 inches apart, and for mass effect in double rows 6 inches apart. Such ribbon plantings are very pretty.

Indoors: Crocus are very ornamental when flowered in pots, pans, or bowls. Use light sandy soil to which bonemeal has been added. Plant 8 to 10 bulbs 1 inch deep, 2 inches apart, in a 6-inch container; water well and set in a cool cellar for about 6 weeks so that bulbs will become well rooted. When top growth has begun, bring them to the light. Keep in a cool location.

Giant Flowered Named Crocus

For growing indoors, use only the Giant Flowered Crocus listed below. They should also be used in all outdoor plantings where the very largest blooms are wanted.

9517 Kathleen Parlow Pure white with rich orange anthers. Very large cup-shaped blooms. The finest white.

9519 King of the Blues Bright blue, fine clear color and very showy, especially when planted with Golden Yellow or Kathleen Parlow. Always a favorite.

9526 Pallas Light lilac, striped on white ground. The rich orange anthers form a sharp but pleasing contrast.

9535 Purpurea Grandiflora Rich, dark purple. Extremely large and most attractive; strong, sturdy grower.

9533 Sir Walter Scott White, striped pale lilac. An unusually attractive combination of colors; always admired.

Any of the above Giant Flowered Named Crocus:

9515 Golden Yellow The most popular of all Crocus either outdoors or indoors. Rich, giant golden yellow flowers. 12 for 40¢; 100 for \$2.75; 1000 for \$22.50.

Ranunculus

8977 Tecolote Giants (See colored illustration on back cover.) The largest and most magnificent strain ever offered. Giant double and semi-double flowers, 3 in. and more across, are freely borne on strong stems 12 to 15 in. long. Our mixture contains a wonderful range of colors—yellows, from straw through all shades to deep golden yellow; reds, including dark crimson, scarlet, orange-red and all other shades of red; orange, pink, many ringed and tipped with a deeper color—in fact, every desired color is included. Do best in a shady location and in moderately rich soil. Fine for cutting. Not reliably hardy north of Washington, D. C., except in warm, sheltered locations where they can be kept fairly dry and protected. Splendid for growing in frames or pots. The roots resemble tiny clumps of Dahlias. Set them, claws downward, 2 in. deep and 4 to 6 in. apart. If grown in pots, plant 6 to 8 roots in a 6-inch pot or bulb pan which should be 6 to 8 in. deep; cover roots with one inch of soil, and allow 2 inches of space between bulbs. Keep in a cool place for several months to root, then keep growing cool, not over 50° temperature.

Hardy Garden Lilies

Please note the different dates on which Lily bulbs are ready for shipping.

Fall is the best time to plant Hardy Lily Bulbs. If you live in a locality where the soil freezes up early, prepare your bed, cover with manure, leaves or straw to prevent freezing until bulbs arrive, and then plant promptly. After planting the bulbs, do not put back the manure, etc., until the ground has frozen. Candidum Lilies must not be planted deeply—two inches of soil over the bulbs is sufficient; cover others with soil to the depth of three times their diameter.

Giant Flowered Hyacinths

The Finest for Beds and Borders and for Growing Indoors

Among the many flowers that can be grown from fall-planted bulbs the Hyacinth stands at the top of the list. It is probably the easiest flower to grow in pots or bowls, and what could be more decorative or attractive than a display of Hyacinths in the house during the winter or early spring! Equally effective and beautiful are beds, borders or groups of Hyacinths here and there among perennials or in front of shrubbery.

The Hyacinth might be grown for its fragrance alone, but with its stately growth, showy flower-spikes, and wide color range, it is a flower that is certainly everybody's favorite.

From a long list of named Hyacinths we have selected those offered on account of their free-flowering qualities and distinct colors. Hyacinths are one of the easiest flowers to grow.

Outdoors: Plant Mammoth bulbs 6 to 7 in. deep, 8 in. apart; Medium size bulbs, 6 in. deep, 6 in. apart.

Indoors: One bulb is usually planted in a 5- or 6-inch pot, depending on the size of the bulb, although 4 bulbs may be planted in a 6-inch pan or 6 in a 7-inch pan. Use only the Mammoth size bulbs for growing in water in the house. French Roman Hyacinths should not be planted outdoors in cold sections; they are easily and quickly grown in pots in the house.

For full cultural directions of all fall bulbs, ask for Burpee Leaflet No. 31, "Bulbs for Winter and Spring Blooming."

How to Grow Tulips

Outdoors: Tulips, except Botanical (Species), should not be planted in soil in which they had been grown the last two seasons. Select a new location. Do not use fresh manure at planting time; well-rotted manure or bonemeal may be used. Plant bulbs 5 to 6 in. deep and 6 in. apart.

Indoors: A mixture of $\frac{3}{4}$ good clean garden soil and $\frac{1}{4}$ leaf-mold to which a little bonemeal has been added will give the best results. A 6-inch pot will hold about 6 bulbs. Place bulbs about 1 in. apart each way. Cover with an inch of soil, and water thoroughly; then put pots in a cold-frame or heel-in in the garden for eight to ten weeks to force root development. Bring pots indoors, first in a cool location and gradually to the average living room temperature. Giant Breeder Tulips

Dillenburg—a wonderful Breeder Tulip

Breeder Tulips are of the same tall, stately growth as the Darwins, require the same culture, bloom at about the same time (during the month of May), but come in colors not found in that or any other class of Tulips. Their rich and unusual blendings of purple and old gold, bronze and terracotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet-scented. All are splendid for cutting and should be included in every garden display. They begin to flower when the Single and Double Earlies are going off. Heights given for each variety are average; they may vary in different localities and seasons.

REMBRANDT TULIPS

9333 Mixed Colors The flowers of Rembrandt Tulips resemble those of the Darwins, but instead of being of solid colors, they are beautifully striped, feathered or flaked in two or more colors. They bloom in May, grow 18 to 22 in. high, and are sometimes referred to as "Striped Darwins." We offer a splendid mixture of many varieties of this artistic and striking class of Tulips. 3 for 25¢; 12 for 85¢; 100 for \$6.00; 1000 for \$55.00.

Rembrandt Tulip

Cottage or May Flowering Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Early Singles have passed, hence the name "May Flowering." The term "Cottage" is of recent origin, and so called because so many were planted around the country homes and cottages of England. As a class they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips.

Cottage Tulips are as varied in their range of colorings as the Darwins but different in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors. Heights given are average and may change according to locality and season.

Beautify your early spring garden with Tulips; Darwins are probably the most popular of all late Tulips

Tall Giant Darwin Tulips

The chief characteristics of Darwin Tulips are the perfect cup-shaped flowers, fleshy petals, tall stems, and lovely colors—scarlet, crimson, rose, pink, violet, purple, slaty blues, blue-violet, lavender, white and golden yellow. They are wonderful for planting in masses in beds or borders, in clumps of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery, and what could be lovelier for cutting?

For a full range of colors in late Tulips, the Ideal Darwin, Breeder and Cottage varieties should be included in your plantings, as each class has its own range of colors, and all three bloom at approximately the same time. The height given for each variety is average, and may vary.

Parrot Tulips

The irregularly formed flowers of Parrot Tulips, with their curiously lacinated and attractively fringed petals, are most unusual. Rich and varied shades, including green, are to be found in the same flower. Coffee Color, Cramoisi Brilliant and Perfecta bear their flowers on slender, willowy stems about 15 in. long; effective in groups in informal borders. Gemma, Fantasy and Lady Derby are taller growing and the larger flowers are held erect on long, strong stems. Parrot Tulips are entirely distinct, and one of the most interesting plants you can grow. May flowering.

NARCISSUS or DAFFODILS

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus, the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the giant trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically these smaller or medium trumpet Daffodils are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types. Some gardeners apply the name Jonquil to the giant trumpet Daffodils, but this is misleading, as Jonquils are small flowered, sweet-scented, have grass-like foliage and belong to the rush-leaved group of Narcissus.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden.

As Narcissus bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses in beds or borders, in groups of 12 or more here and there in the hardy perennial border or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Narcissus are also ideal, easily grown subjects for winter blooming in the house.

How to Grow Daffodils

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart according to their size. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot; cover with 1 in. of soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

Medium Trumpet Daffodils

On this and the next page we offer a choice assortment of Daffodils whose trumpets are not so long as the perianth segments. In this group, where the trumpet is greatly reduced in size and flattened, we refer to it as a "cup."

The Medium Trumpet class is divided into three groups—Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group as to their distinguishing characters.

Barrii Daffodils

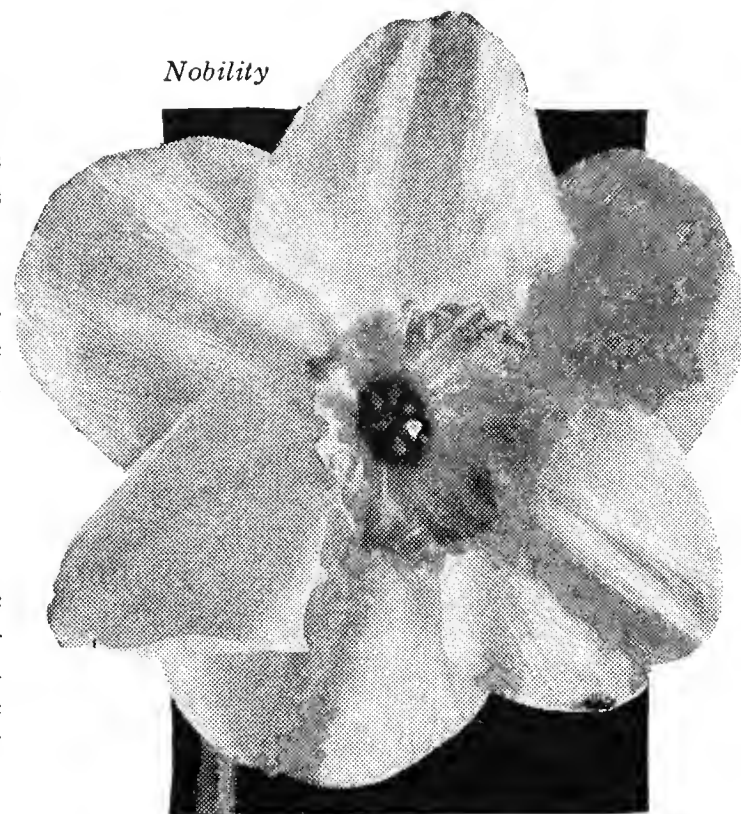

In this group, the cup or crown measures less than one-third the length of the perianth segments. For this reason they are often referred to as "Short-cupped Daffodils." They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, delightfully scented, and usually borne in clusters of two or more on strong stems. Some varieties produce their much prized blooms above the erect and rush-like foliage, while others are about level with the tops. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

*Polyanthus Paper White
Grandiflora Narcissus*

Polyanthus Narcissus

The popular flower for growing in the house during the winter and early spring either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after Oct. 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place.

Polyanthus Narcissus may also be grown in soil. They are not suited to garden planting except in frostless localities.

9460 *Paper White Grandiflora*

The Fragrant White Narcissus

The large, pure white blooms are borne in clusters and are highly prized for their beauty, fragrance, and the ease with which they can be grown. This accounts for their universal popularity.

LARGE BULBS: 12 for 55¢; 100 for \$3.75; 1000 for \$33.00.

9459 *Soleil d'Or—Golden Yellow Narcissus*

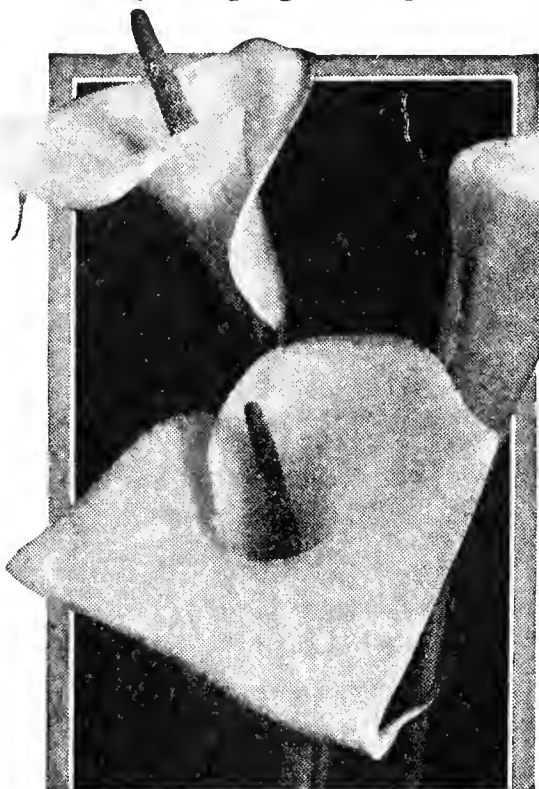

Often called the "Yellow Paper White," the sweet-scented blooms being rich golden yellow with a deep orange-red cup. May be grown in water and pebbles, but do best when grown in soil.

LARGE BULBS: 3 for 40¢; 12 for \$1.25; 100 for \$9.00.

Pot should be deep and one inch wider than the diameter of the bulb. Set bulb so that half is above the surface. Water sparingly until flower-stem appears.

Easter Lilies

Popular throughout the world, loved and admired by everyone. We offer three varieties that are ideal for indoor growing—Harrisii, Longiflorum giganteum, and Erabu. Use a 5- or 6-in. pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well-rooted; afterward bring to the light and grow on in a temperature of not more than 60°. Ideal garden subjects in frost-free locations.

Giant Easter Lily

8614 Erabu

(Japanese Easter Lily)

An improved type of the well-known *Lilium Formosum*, with uniform dark colored stems. Often called "Black-stemmed *Formosum*." Plants are of healthy, strong growth, about 3 ft. high, and bear their magnificent flowers in whorls at the top of the strong stems. Flowers are large, trumpet-shaped, 6 to 8 in. long, pure waxy white and sometimes tinged with green near the base; the anthers are yellow, which adds to the beauty of the blooms.

Erabu Lily is largely grown for Easter forcing, having practically replaced the old *Formosum*. They are delightfully fragrant and if cut when partially open, can be kept for two weeks. Gets its name because nearly all of the bulbs are grown in the Erabu Isles. Ready for delivery in October.

30¢ each; 3 for 80¢;
12 for \$2.75; 100 for \$20.00.

8612 Giant Easter Lily (*Longiflorum giganteum*)

The flowers are of the purest white and the largest of all Easter Lilies. The plant is of sturdy, stocky growth and largely forced for Easter, but is just as valuable for later flowering. We handle the "Northern or Saitama grown" bulbs as we consider them the best. They are ready for shipment in November.

30¢ each; 3 for 80¢; 12 for \$2.75; 100 for \$20.00.

Bermuda Easter Lily

(*Lilium Harrisii*)

Quick to come into bloom; may be forced for Christmas, but it is for Easter that it is so extensively planted. Plants grow about 3 ft. tall and produce 5 to 12 or more large, trumpet-shaped, fragrant waxy white blooms with contrasting yellow anthers. Our bulbs are genuine Bermuda grown and ready for shipment from August to December.

PERENNIAL FLOWER SEEDS

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better, so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag. The Burpee leaflet, "Perennials from Seed," sent **Free** upon request.
